Spanish Edition

As in previous issues since 1968, the 2013 Review of Maritime Transport contains a wealth of analysis and unique data. The Review is the renowned United Nations source of statistics and analysis on seaborne trade, the world fleet, freight costs, port traffic and the latest trends in the legal and regulatory environment for international maritime transport. This year's Review includes the 10 year time series of unique data on liner shipping connectivity. Underlining recent research that suggests that containerization had a stronger impact on driving globalization than trade liberalization, the Review discusses global developments in containership deployment, and then looks at trends liner shipping connectivity in Latin America, Africa and Asia.
